Testimonial

We've had the pleasure of working with SEQ SIA (led by Nils Putniņš) on multiple information security engagements at Printful, ranging from targeted penetration testing to in-depth evaluations of our platform's security maturity. In every project, SEQ SIA has demonstrated a rare combination of technical precision, strategic thinking, and professionalism.

Most recently, during a performance and security audit of one of our core systems — used daily by thousands of employees and clients — SEQ SIA delivered beyond expectations. Their structured methodology, clear communication, and actionable insights directly contributed to increased system reliability, scalability, and resilience. The result is a safer, more robust platform for our users and customers.

SEQ SIA has become a trusted security partner, and we highly value the clarity and confidence they bring to complex security challenges.
